Dear Mrs. Walker;

I wanted to personally thank you for sending us your medical textbooks and other educational materials. Your contribution has significantly increased the capability of our medical mission in Afghanistan to help educate their physicians. It is imperative that they have the medical resources needed to be able to reference to help treat their patients. Our main mission here is to help the Afghanistan physicians to be able to treat their own people by providing them the materials, training and equipment needed to do just that. We have relied on donations to help build our medical library and with your coordination efforts, we have been able to put together quite an extensive collection of resource materials.

It is so nice to see people like yourself concerned about other parts of the world and the medical care that is being given there. I want you to know that we are doing everything within our capability to help advance their knowledge into the 21st century and your contribution has been key to help in that endeavor.

Thank you so much.

Joshua L. Wright, MD
